Chipley, Fla. Sept. 18th 1897.

The Board of Directors of the State Agricultural College met at Lake City last week and elected Dr. W. F. Yocum, of Bartow, president.

where a female editor was threatened notified that body of the coming of Maj. with a suit of tar and feathers.

gratulations of all the people are tacitly extended to the new president. What has become of the advance in wa-

A poor editor who knows how it is himself, says: "It is said that a New York girl kneads bread with her gloves on. That is no news to us. We need bread with our boots on, we need bread with

our pants on, and if those subscribers who

are so much in arrears don't pay up soon,

we will need bread without anything on."

A Georgia daily newspaper the other day, in leaded type and under a "scare head" predicted a decline in cotton to the 5-cent notch or words to that effect. It is to ec hoped that the crop bulletins published Saturday has been read in that newspaper office. There is nothing in those bulletins which looks like 5-cent

The growth of the commerce of Pensaable, and there is every reason to expect that growth to continue until Pensacola and it is inevitable, therefore, that with taken. the growth of the foreign demand for the

There are eight kind of people who do a town no good says an exchange: There are, first, those who go out of town to do their shopping; second, those who are opbusiness; fourth, those who imagine they own the town; fifth, those who deride public spirited men; sixth, those who oppose every movement that does not originate with themselves; seventh, those who oppose every movement that does not appear to benefit them; eigth, those who seek to injure the credit or reputation of individuals.

and the name of the new publication is tance, this will bear fruit in due time. exc llent daily journals and will doubt- 1898. less give Florida the best newspaper the State has ever had. Both the Citizen and Times-Union were papers characterized encourage its cultivation. by more energy and ability than is usuces should give Florida as able a journal giving them merely nominal excursion as exists anywhere in the South. We wish The Times-Union and Citizen a long, prosperous and useful life.

In view of the fact that Jacksonville's (the boasted Mrtropolis of the State) merchants and business men would not have the country newspaper advertising of Mr W. G. Powell, AS A GIFT, should inspire the country newspapers to see that Jacksonville's business men looked elsewhere for their support. Don't for a moment think that we place the Press of Jacksonville on the same level with those other "fellers," for they are a wide-awake and energetic class; but merchants and other business men who would not have country paper advertising "as a gift" should be left severely alone. Mr. Powel's work is an honorable and worthy one, and will do good, notwithstanding a a few fogies in the "Metropolis."

#### Telling the Whole Truth.

The health authorities of New Orleans are to be commended for the straightforward and manly course they have adopted in giving to the public all the facts about the yellow fever there. It is their duty to do this, of course, but boards of health, like men, do not always rise to the full measure of their obligations, and when they do in the face of self interest and pressure, they ought to be given due credit. New Orleans will not be hurt by the publication of the truth. The above board policy will do more to keep down a n cless panic than attempts at suppresion

#### ONLY A PRIVATE CITIZEN.

Colonel Chipley's Effectiven Work in the Interest of Pensacola.

After reading in the News yesterday of Col. Chipley's work in Washington a gentleman remarked to a representative of the News that he was glad to see, among the important things accomplished, that work was soon to be begun on the Na-T. C. JONES . . . . . . . EDITOR tional Cemetery Military road; that he had heard of only two men in the county opposed to it: that one of these, a prominent citizen, was reported as having said that Mr. Chipley seemed to be quite prom inent in connection with the road, but while he might be a good railroad man. he did not see what assistance he dould give to this military road.

This impels the News to report some The avenues of daily usefulness are thing that occurred two months ago. Col. opening up to women in Connecticut, Chipley went before the city council and Humphrey, United States Quartermaster in charge of the military road. He said At last everybody seem satisfied with that the map the war department had the present and prospective future of the sent him of this road indicated that it State Agricultural College, and the con- was intended that the city should build from its paved streets to the limits of the city to connect with the military road. rates, and this will result in fully \$100,000 | ducts, thus increasing the wealth of the low rate of freight upon the road materi- raised in Western Florida next year. ges that was promised under the Dingley al-either chert or crushed rock-for a markets for some reason has been delay- ing the government appropriation go that ing crowned with success. much farther. Of these 4,564,-Still, even with that sentiment, had the 000 farms, a fraction more than 71 per it would have been passed overwhelmingly.

> "I anticipate a very exciting session this winter. It will prove, too, to be a very important one for this country, and American breadstuffs will cause the tide of if matters come up which I think will, gald to flow to this country. During the the next session will be a history-making twelve months ending with last June we

#### Our Stock of Money.

It is interesting to study the official statement giving the condition of the treasury on the first of this month. It shows that, so far as can be ascertained, the total amount of money in the country of every kind is \$1,369,254,335, and the amount in the treasury is \$703,674,237. The money in the treasury embraces \$398,-908,078 standard silver dollars, which cannot be forced into circulation, and \$15,-335,285 of subsidiary silver coin.

This statement, it should be remembered, includes all the silver dollars against which \$379,112,504 of silver certificates have been issued, and thus that amount of money is counted twice, but after making the proper deduction it will be seen that we have over \$2,000,000,000 of all

One year ago the amount of money of all kinds in circulation was \$1,539,169,634. The amount of money pow actually in cir culation is \$1,665,606,008. Thus during the last year the increase of money in circulation throughout the country is \$126,510-464. This means that' in round numbers, \$125,000,000 of money not in circulation one year ago is now either in use in business or has been paid out for various pro-

child of our 73,000,000 population there is about \$23 in circulation.

The actual amount of gold in circulation is nearly \$60,000,000 greater than it was a year ago. There is in circulation \$521,-848,563 of gold, while we have an actual and silver paper, whith over \$400,000,000 subsidiary silver in the treasury.

In spite of all that has been said about "striking down silver," we have more silver in circulation than ever before, and there is not a gold standard country in the world, that is to say no other leading nation of the world which has so large a portion of silver in its currency as the United States .- Atlanta Journal.
